This report is based on evidence from inspections of physical education between September 2008 and July 2012. Her Majesty’s Inspectors and additional inspectors from Ofsted visited 120 primary schools, 110 secondary schools and seven special schools. This report draws also on evidence from four visits to schools to observe good practice in PE.

Part A provides an overview of findings about pupils’ achievement, the quality of teaching and the curriculum, and the leadership and management of physical education in the schools visited. It evaluates the impact of the recommendations made in an earlier report, Working towards 2012 and beyond. It recommends actions for schools and the Department for Education to secure further improvement in the quality of physical education in schools.

Part B identifies the common weaknesses seen in PE and looks at what the most effective schools have done to overcome these weaknesses so that physical education is good or outstanding.
Beyond 2012 - outstanding physical education for all

Written by Ofsted

This (2013) report found that PE is generally in good health in the UK. Considerable investment over the last decade has ensured PE is a central part of school life for pupils of all ages. However, in some schools Ofsted found there was not enough physical activity in PE lessons. In more than a quarter of schools, teaching did not improve pupils’ physical fitness. This report also considers the work of the School sports partnerships and their impact on raising standards.
